

Grow Your Own

Cannabis Greenhouse Kits

Our expertly crafted greenhouses are designed and engineered for optimal growing conditions of all your favorite herbs. With new laws supporting the legalization of cannabis you can now experience the joy and independence of growing your own at home.

Create a Sanctuary for You and Your Plants

We have decades of experience designing and manufacturing high-quality aluminum and glass greenhouses. Now, we have created a premier DIY greenhouse kit specifically for growing cannabis.

HARVEST GREENHOUSE

Strong & Beautiful Glass Greenhouses

The Harvest Greenhouse™ is engineered with a strong, extruded aluminum frame that meets 20 lb. snow loads and 105 mph wind loads. Choose 1/8" tempered glass or 5/16" triple-wall polycarbonate glazing for optimal growing in your private garden.

- Glass is beautiful and provides more light, but gets hot in summer.
- Triple-wall polycarbonate diffuses the light for privacy, and is a more efficient insulator in summer and winter.

Comfortably grow six full-size Cannabis plants, plus herbs and veggies in our most popular model (O-10G).

Our DIY greenhouse kits include all parts pre-cut, pre-drilled, and labeled for easy assembly. Put this on a concrete pad or wood frame base and gravel floor for year-round growing. Additional sizes available.

The Harvest Greenhouse can be a beautiful addition to your home garden with endless possibilities for year-round organic gardening.

Harvest Greenhouses are engineered and manufactured by Arcadia GlassHouse LLC, with 5-star Google Reviews and A+ rating from the BBB.

Our Greenhouse Kits Include:

- Strong Extruded Aluminum Frame
- Stainless Steel Hardware
- 1/8" Tempered Glass or 5/16" Polycarbonate
- Motorized (or Manual) Ridge Vent
- 36" Aluminum Door w/ Retractable Screen & Lock
- Installation Manual & Videos
- DIY Assembly with Technical Phone Support
- Heating, Cooling, Lighting, Bench Options Available
